"CRIS" page created

A page on current research information systems (CRIS) has been created in the Publications space ([Cris](http://apice.unibo.it/xwiki/bin/view/Blog/Publications)), to introduce APICe readers to the very notion of CRIS.

Correspondingly, the [Iris](http://apice.unibo.it/xwiki/bin/view/Blog/Publications) page has been suitable updated—and also moved to XWiki 2.0 syntax.

Publications Home page to XWiki 2.0

Also the Publications home page has moved to the XWiki 2.0 syntax. Its content, too, has been slightly modified to reflect the general purpose of the APICe XWiki.

Home page to XWiki 2.0

The APICe Home Page has been translated to the XWIKI 2.0 syntax.

The page has also been updated to reflect the new general purpose of the APICe XWiki to generally support academic activity.

tuProlog 4.0 has been released

tuProlog 4.0 has been released! The new version aims to provide a stable environment

- new parser redesign and implementation based on ANTLR
- new Java API for theories and term creations
- full support for the JSON serialization and de-serialization of terms
- new development process splitting the code into four main modules: core, parser, presentation, ui
- dockerization of the command line interface
- completing the pending bugfixes, with special regards to some old annoying bugs
