APICe Publication Space ................................................................................................................. 3
APICe Publication Space

Nowadays, academic work (research, teaching, project) requires a large amount of scientific publications, and typically produces a lot of original scientific materials. In order to display and support the many forms of today academic activity, a handy and precise representation of such a huge collection of pieces of scientific literature is certainly more than useful, particularly when connected in a smart way to institutional CRIS as well as to the many authoritative sources of scientific and technical literature available online today. This Publications space in the APICe space is meant to address such needs, by making it possible to record and link the scientific material considered relevant for any scientific, teaching, and technical activity in the academic context.

Publications in the APICe space can be browsed by year of publication:

- All yet-unpublished works ordered by status: Note, Draft, Submitted, Rejected, Accepted, Accepted with revision, Revised, Camera-ready sent, Proof, In press, Online
