Public Web Site

No One Sent Ideas

- We should make our public site more attractive
- Not from a technical viewpoint. . .
- If we do not receive any feedback soon, we will proceed without any democratic process :)

Market?

We Had One Remark

- “What is the pathway to impact, how is SAPERE going to influence the market in general? ”
- Possible ideas: in the long term, SAPERE is going to change the way in which
 - services are conceived and provided
 - spaces are conceived, and their relationship with the computational infrastructure
 - people interact with their environment, look for services, and exploit them
 - ...
- Please, articulate your contribution *now*
